

Please allow XM to offer the kind of programming consumers require for travel and entertainment. I hope that we will continue to have the freedom to chose what source we want to get our entertainment and news from. In this era it seems unfathomable that there would be any consideration given to the concept of limiting our choice of broadcasting options. I implore those voting on this issue to allow our freedom of choice to continue as the ramifications to those elected who do not preserve this freedom will be drastic come election time.
